## State Administration Appropriations Committee

### 2006 Trust Fund Review

Trust funds consist of receipts that are earmarked for a specific purpose, either by general law, the Constitution, or a trust agreement. Each receipt is credited to the accounts which make up the trust funds. Based on their principal uses, trust fund accounts can be grouped into the following distinct types: *operating* to fund specific activities or programs; *distribution* to disburse funds to local governments or to individuals; *projects* to fund construction or repairs and replacements of damaged facilities; *clearing* to divide receipts among other accounts; and *revolving* to provide loans, petty cash, or working capital funds.

Article III, Section 19(f)(1), of the Florida Constitution specifies that trust funds will terminate not more than four years after the effective date of the act authorizing the creation of the trust fund; however, certain trust funds are exempt from automatic termination.

A staggered schedule of review allows for each trust fund to undergo legislative review every four years prior to automatic termination of the fund. During that review, a fund may be [re]created, terminated, modified, exempted, or retained with no action. The 2006 schedule of review includes the trust funds of the Department of Business & Professional Regulation, the Department of the Lottery, and the Department of Management Services; thereby, under the purview of the State Administration Appropriations Committee.

5		160E010	BACK OUT CONTRACTUAL SERVICES BUDGET FROM EXPENSE	Section 216.011(1)(n), FS, defines the appropriation category "Expense" and has historically include contractual services. Contractual services are defined in section 287.012, Florida Statutes, as the "rendering by contractor of its time and effort rather than the furnishing of specific commodities." Based on statutory changes effective July 1, 2006, the Expense category can no longer include contractual services. This issue represents the transfer of contractual services budget from the Expense category to an alternate, more appropriate appropriation category. This includes the transfer of services related to legal, custodial & janitorial, investigative, professional training, lawn care, grounds keeping, & landscaping, mailing & delivery, banking, linen & laundry, office & security equipment repairs & maintenance, information technology. 10	3000100	ONLINE GAMES CONTRACT	The on-line games vendor, GTech Corporation (1/31/05 - 3/27/11 contract period) is paid 1.1499% of sales, plus the continuation of various on-line-system features. The base-budget appropriation for this contract is \$26,073,587. The cost is directly related to projected on-line ticket revenues; therefore, the appropriation should be adjusted to agree with the most recent sales forecast of the Lottery Revenue Estimating Conference. The Lottery's request was based on the June 2005 sales forecast and the Governor's recommendation was based on the October 2005 sales forecast. The agency's request and the Governor's recommendation also include \$990,000 to lease 500 additional retailer terminals; thereby, increasing the number of terminals to 13,500. The Estimating Conference reached a new consensus at its official meeting on February 27, 2006. The updated amount of adjustment is a <b>decrease of \$94,136</b> , excluding the 500 additional terminals.	0.00	0	0	4,808,974	4,808,974	0.00	0	0	2,127,407	2,127,407	0.00	0	0	(94,136)	(94,136)

15	5000300	ADJUSTMENT TO RECURRING SPECIAL CATEGORY APPROPRIATION - TRANSFER TO EDUCATIONAL ENHANCEMENT TRUST FUND	The base budget includes \$60 million to transfer unencumbered year-end cash to the Educational Enhancement Trust Fund, as mandated by s. 24.121(4), F.S. This amount is based on the recent history of the fund. According to the agency, they have reformulated the calculation of the monthly transfers to the Educational Enhancement Trust Fund, which they state has resulted in more funds being transferred each month and should leave only a small unencumbered balance to be transferred at year end. Hence, the agency requests and the Governor recommends elimination of the recurring operating appropriation and future transfers to be made through a non-operating transfer to Education Enhancement Trust Fund. The House budget reduces the base amount from \$60 million recurring to \$2 million recurring and \$2 million non-recurring. Fiscal year 2005-06 agency budget amendment #06-08 (EOG #0236) moved 7 FTE's and \$533,368 from that lump sum appropriation into operating categories. The \$533,368 represented funding for the last eight months of fiscal year 2005-06. This issue annualizes that amount. This is a new issue. That amendment provided funding for the last eight months of fiscal year 2005-06. This issue annualizes the portion of the lump sum that was released in fiscal year 2005-06 and places it in the appropriate operating categories. 23	3000320	ADDITIONAL RESOURCES-LEGAL SERVICES	Retention of OIR experienced staff is necessary due to the complexity of the Florida Insurance Code and the increasing complexity of Federal law governing health insurance. The LSO is submitting this request for approval of 2 Senior Attorney positions, funding for travel expenses and funding of digital recording equipment. The LSO caseload in legal is increasing, for example, in Fiscal-Year 2003-2004 the total number of Legal assignments were 1321 and in Fiscal-Year 2004-2005 that number increased to at total number of 1642. NOTE: The Governor's Recommended Budget includes \$182,691 (with \$133,699 for OPS) to provide resources to meet increases in legal workload for the Office of Insurance Regulation. Attorney caseload has increased for the Office in the areas of Market Investigations, Prosecution of Unauthorized Insurers, and Public Rate Hearings. Section 5 of Chapter 2005-11, Laws of Florida, requires, effective June 1, 2005, a public hearing for all residential property insurance rate filings greater than 15% (previous threshold was 25%). With multiple hurricanes striking Florida in 2004 and 2005, there will be many rate filings exceeding the public hearing threshold and requiring legal expertise and travel. 24	3000340	ADDITIONAL RESOURCES PROPERTY AND CASUALTY	The additional positions are required due to the enactment of the Annuity Suitability and Discount Medical Plan laws. In addition, due to the 2004 hurricane season, we learned of industry wide deficiencies in the statutorily required reporting of the P&C industry to the OIR. Finally, due to the on-going and increasing litigious environment of the professional liability marketplace, Market Investigations will be conducting targeted examinations. 25	3000350	ADDITIONAL RESOURCES FOR MARKET INVESTIGATIONS	The increase in caseload between fiscal years '03/04 to '04/05 was due to the 2004 hurricane season and issuance of OIR Emergency Rules and reporting requirements. The continued increase in this fiscal year is due to the enactment of the Annuity Investments by Seniors and Discount Medical Plan Organization statutes, QUASR and Professional Liability reporting compliance, Hurricane Model Investigations as well as our day-to-day investigations/examinations of alleged violations of the Florida Insurance Code. 26	3000360	ADDITIONAL RESOURCES OFFICE OF FINANCIAL REGULATION INSPECTOR GENERAL	OFR has six primary functional areas, consisting of Financial Institutions, Securities, Finance, Money Transmitters, Financial Investigations and Legal. There are at least 25 specialized and general areas of potential risk to the agency that require periodic audits. Many of these audits and management reviews will not be completed once; rather, they will be completed periodically, once every three years, per statutes. This is necessary to establish initial audit and review related baselines and then periodically follow up on audits and reviews for purposes of assessing improvements with regard to internal controls and management of risks associated with OFR's programs, functions, sub-functions, processes, operations and administration. A staff of one individual is not sufficient to meet the demands of the OIG. At current staffing levels, the OIG has only been able to address high priority items, such as investigations of consumer complaints, personnel issues and other investigative matters. \$67,291 recurring and \$5,243 NR funding from Regulatory Trust Fund. 27	3000370	ADDITIONAL RESOURCES- INFORMATION TECHNOLOGY SUPPORT	The Information Technology systems in OIR need constant updating and editing to meet the challenges of the ever changing insurance market. Currently, this function is handled by contracting with external vendors for staff augmentation. If funding is approved for 1 additional position a reduction in contract costs will be realized. This can be cost prohibitive in certain circumstances as the hourly rate for a programming expert per the state IT contract is \$75.00 - \$122.00/hour. Approval of this request will enable the Office to better manage and control the technology systems housed within the OIR. The expected hourly rate for this FTE in-house position is \$23.30/hour. The model, to the extent possible, uses existing databases and is modular in design. The model's elements and interactions were designed through interaction that brought together experts from public and private institutions across the country. 	3000700	CONVERT INFORMATION TECHNOLOGY CONSULTING SERVICES TO FULL TIME POSITIONS	The DIS is responsible for ensuring integration and efficient operation of diverse mission critical systems across several information technology platforms i.e. mainframe, network and web. In certain support areas within DIS the mergers that resulted in the Department of Financial Services have placed DIS into a position of dependency on information technology consultants who were in place in the three (3) agencies. Presently DFS is spending approximately \$3,200,000 annually on contractor support. In order to effectively leverage its human resources, provide quality customer support, retain valuable institutional knowledge and decrease the funds required for contractor support DIS would like to reduce its reliance on contractor support staff by increasing full-time FTEs to take on the work being performed by these contractors. In order to implement the first phase of this plan, DIS is requesting three (3) full-time employees to support legacy systems currently contracted out to two (2) contractors. DIS is currently paying \$70/hr. for two Developers to provide support for DFS business systems that utilize that system and \$86/hr for one (1) Data Base Administrator to support the systems in use by the Division of Workers Compensation. 	3000710	MORTGAGE BROKER EXAMINATIONS	OFR is requesting 8 FTEs to examine an increasing number of regulated entities and protect consumers from fraudulent or abusive activity in the mortgage industry. There has been an overall increase of 84% (from 5,983 to 11,028) in the number of mortgage business licensees (i.e., mortgage brokerage businesses, correspondent lenders, and mortgage lenders) from FY 00/01 to FY 04/05. There has also been a 112% increase (from 28,140 to 59,896) in the number of individual mortgage brokers licensed from FY 00/01 to FY 04/05. A recent report by the FBI listed the State of Florida as one of the major areas where significant mortgage fraud has been occurring, and will continue to occur. The requested positions and funding will allow the Office to better safeguard the private financial interests of the public by examining and regulating more licensed mortgage entities. \$530,909 recurring and \$46,744 NR funding from Regulatory Trust Fund. NOTE: The Governor's Recommended Budget includes \$577,653 (with \$447,685 OPS) to provide for examinations of an increasing number of regulated entities in the mortgage industry. These examinations are targeted to protect consumers from fraudulent or abusive activity. These additional resources will allow the Office of Financial Regulation to meet the increase in workload and assist in the fight against mortgage fraud. 	3000730	MONEY TRANSMITTER EXAMINATIONS	The Money Transmitter industry currently consists of 950 registered companies operating at more than 31,000 retail outlets throughout the state. OFR has determined that there are currently 66 companies with more than 20,000 retail locations in Florida, who maintain their headquarters in other states. The majority of the firms in question are large operations with sophisticated computer and recordkeeping systems. OFR has determined these firms keep the majority of the business records required to conduct an adequate examination at their out of state headquarters. Furthermore it has been determined the majority of these businesses have centralized compliance departments at their headquarters locations making the company's headquarters the most efficient location to conduct an examination. MTRU's goals include the examination of these 66 large money transmitters on a 4-year examination cycle or approximately 16.5 examinations per year. The examinations conducted on these types of transmitters are complex safety and soundness reviews covering such areas as financial condition, recordkeeping, and the implementation and execution of federally required Anti Money Laundering internal controls, policies, and procedures. 34	3000740	ADDITIONAL RESOURCES FOR APPLICATION PROCESSING	Based on operations for FY 04/05, the finance licensing process required a total of 33,480 hours based on the 29,368 applications actually received and an internal standard processing time of 1.14 hours per application. At current staffing levels, the Bureau will be able to adequately handle 24,393 applications (15 FTEs x 1854 average annual hours divided by 1.14 hours), resulting in a shortfall of 4975 applications. In order to fulfill this need, the Bureau anticipates it will need approximately 3 new positions (4975 x 1.14 hours = 5670 hours divided by 1854 hours = 3 FTEs) to process applications. Additionally, the Bureau requests authority to replace its OPS phone staff with 3 FTEs, offsetting \$68,640 of the cost by reducing OPS funding by that amount (\$11/hour x 40 hours x 52 weeks x 3). The Bureau requests authority to add 6 FTEs funded from the Regulatory Trust Fund to allow it to continue to meet its statutory duties to process applications within the requirements of Chapter 120, Florida Statutes, the Administrative Procedures Act, and to provide customer service to the industry and public. 35	3000760	REDUCE FULL TIME POSITIONS APPROVED IN SB 1486 - CONSUMER ADVOCATE OFFICE	Section 27 of CS/CS/SB 1486 in the 2005 Legislative Session provided 4 FTE's for the Consumer Advocate Office to be more active in filings made by insurance carriers. The Office of Insurance Regulation receives several hundred property and casualty filings and several hundred life and health filings annually. The filings cover rate changes, form changes and other purposes. Because the subject matter of these filings is so varied, flexibility to address the appropriate cases is a major consideration. The prominent cases seem to be homeowner's rates, but that could change with any significant market shift. The goal of the Office of the Consumer Advocate is to use the appropriation most efficiently while maintaining some flexibility to address issues in all areas of concern. Accordingly, the office is planning to hire only 2 FTE's and is requesting the balance of the appropriation not required for the positions be moved to Other Personal Services, where it would be used to hire consultants in various specific areas, as needed. The vendor who currently provides these services typically increases the cost for their services by 4% each year. By adding two (2) Fiscal Assistant II positions to the Division's Disbursement Unit, the division's non-operating budget requirement will be reduced by \$340,054. This is a new issue. These positions are targeted for the Palm Beach and Ft Lauderdale areas that have historically had the highest concentration of fraudulent activity. The National Association of Securities Dealers (NASD) recently opened a new regional office in Boca Raton to be closer to the growth in the industry. The NASD and other federal regulators focus on national market issues and net capital issues of firms, while the State provides the front line of defense for individual investors. 40	3000820	ADDITIONAL RESOURCES REQUIRED FOR EXAMINATION OF FINANCIAL INSTITUTIONS	The Legislature provided OPS funds for the current fiscal year to allow the Office to hire retired state and federal bank regulators. With the help of the few OPS examiners who were interested in this, the program is meeting its statutorily mandated duties of examining and regulating state financial institutions, but it has become increasingly difficult to meet the Office's safety and soundness examination requirements as well as the requirements of the federal regulatory agencies under our alternating examination agreements. More detailed examination requirements relating to anti-money laundering and the Bank Secrecy Act have added 80-160 hours for each examination. More time is required for problem situations. Also, additional resources may be required over the next several years to deal with regulatory issues stemming from the effects of the recent and upcoming hurricane seasons, as well as the effects of any economic or real estate downturns. The Office projects FY 2006-07 exams will require a total 99,829 hours. Based on its current staff, the Office will be able to adequately handle 86,240 hours, resulting in a shortfall of 13,589 exam hours that cannot be met within current staffing. 47		36209C0	DATA CENTER MECHANICAL AND ELECTRICAL DISTRIBUTION SYSTEMS UPGRADE	DFS has an existing data center in Tallahassee sized at approximately 5700 square feet. At a minimum the Department has a need to upgrade the data center's mechanical and electrical distribution systems to accommodate growing business needs. The Firm RTKL, Mechanical, Electrical and Telecom Engineers, was hired to conduct an assessment of the DFS Data Center's current capacity and to document the estimated needs and costs to increase current capacity to accommodate growth. RTKL proposes the installation of new Power Distribution Units in the data center with dual source distribution from existing UPS module, which will take the existing facility to approximately year 2009 electrical capacity. The mechanical equipment in the data center needs to be reoriented to accommodate the additional equipment cooling based on day-one requirements. \$400,000 NR funding from the Insurance Regulatory Trust Fund. 49	36308C0	WEB-ENABLING COMPANY ADMISSION APPLICATIONS	As part of a technology plan that optimizes technology resources and provides a sustainable framework for integration and growth for insurance regulatory functions; the OIR has identified a need to web-enable Company Admission Applications. This project is the final phase of a plan which includes financial analysis and workflow (funded in 03/04 and 05/06), integration of national systems such as the National Association of Insurance Commissioners (NAIC) "Uniform Certificate of Authority Application" (UCAA) and "Accelerated License Evaluation Review Techniques" (ALERT), internet submission of company applications and other manual data submissions. The foundational system for the plan is the Company and Other Regulated Entities (CORE) Navigator. The number of applications for licensure received increased from 268 in 2003 to 304 in 2004 and 624 (annualized) for 2005. By moving to an electronic workflow for company admission applications processing, we have decreased the number of days to process an application from 141 days in 2002 to 54 days in 2004. This number will be further reduced by allowing internet submission of admission applications and a seamless integration with the UCAA electronic system. Further, the efficiency of electronic filing will be a greater incentive for insurance related carriers to enter the Florida market, thereby increasing availability of insurance products to Florida consumers and increasing the tax base for the budget of our state on an expedited basis. Funding is from the Insurance Regulatory Trust Fund. TRW \$350,000. OIR IT priority issue 4.	0.00	0	0	490,000	490,000	0.00	0	0	490,000	490,000	0.00	0	0	350,000	350,000	
50	36315C0	DEVELOPMENT OF INTERNET BASED OUTREACH TOOLS FOR MEDIGAP INSURANCE BUYERS	To provide full accessibility to the consumer, the OIR needs a rate data collection application to gather and store the data necessary to allow rate comparisons and provider availability via the Internet for the vast array of Medigap Plans, licensed carriers, pricing features and underwriting characteristics. The Office intends to publish this data in a format that will be readily available to everyone-including the Department of Financial Services' Consumer Services group who provide one-to-one consumer counseling and the Agency of Health Care Administration (AHCA) for its various reporting needs. The user interface needed to accomplish this has not yet been developed. Develop and provide a positive, interactive internet-based outreach by enhancing the usability of an existing data collection application and creating new web-based interfaces for Florida's Medigap consumer. 52	36318C0	LICENSING ENFORCEMENT SYSTEM	The Office of Financial Regulation (OFR) is responsible for regulation and licensing of entities and individuals who provide financial services to Florida consumers. OFR has a set of computer systems (6 main frame + more than 30 desktop applications) that are obsolete and not integrated. The goal of the system will be to integrate all enforcement, regulatory, licensing and consumer complaint data into a single system to more effectively serve the regulated industries and Florida consumers. It will improve information available to consumers for more informed decision making, allow applicants and registrants to file and maintain their registration information in a paperless environment, allow more effective targeting of potential problem entities, and streamline numerous processes that are now largely manual. Planned start date of July 2006 with a completion date of June 2009. Updated numbers from OFR for request FY- 2006-07 is \$5,009,600. Estimated total project cost \$11,453,000. 53	36319C0	CONSOLIDATION OF TECHNOLOGY - FUNERAL AND CEMETERY SERVICES	Legislation took effect on October 1, 2005, which consolidated all death care industry functions in The Department of Financial Services (DFS) - Division of Funeral, Cemetery and Consumer Services. Approximately 4000 licensees from DBPR and 3500 licensees from DFS are consolidated in the new Division of Funeral, Cemetery and Consumer Services at DFS. A system is needed to support the licensing, educational, complaint, inspection, examination and investigative functions for all of the industries' licensees. The consolidation of the death care system will take advantage of the existing and highly integrated ALIS, AALF, DICE, eAppoint and ServicePoint systems now in use at DFS. Because the requirements of the new Division of Funeral, Cemeteries and Consumer Services are very similar to those of the existing Division of Agent and Agency Services, the existing system can be modified and enhanced as a cost effective alternative to building a new system. \$1,377,430 NR funding from the Insurance Regulatory Trust Fund. Monies from the Menorah Gardens settlement agreement were, per the agreement, deposited in the Insurance Regulatory Trust Fund. This issue is funded from those settlement funds. 54		36355C0	LAW ENFORCEMENT COMMUNICATIONS AND ANALYSIS ENHANCEMENT	Information analysis and case management are key elements in a successful long-term major economic crime investigation involving an offense such as insurance fraud. Organizing, querying and researching data are primary duties associated with the Crime Intelligence Analysis function. Software is available that will provide the Division of Insurance Fraud's crime analysts with the capability of link-charting and analysis involving long term, major investigations. Link charting allows business associations to be determined, allows for the tracking of financial transactions and places activities on a timeline for case preparation and prosecution. The purchase of this standardized software will allow uniformity and transferability of data and intelligence during insurance fraud task force responses and major investigations. The Division analysts will require a stand-alone license based on the fact that the analysts assist on most major insurance fraud cases with Division investigation teams, as well as other state, federal and local task forces. 17 Software license @ \$3,850 for \$ 65,450 plus training. 55		36399C0	EIGHT HUNDRED MEGAHERTZ RADIOS AND MAINTENANCE OF COMMUNICATIONS NETWORK	This issue involves the State of Florida purchasing and maintaining a maintenance agreement for recently acquired M/A-Com radio equipment as part of the State of Florida 800 MHz State Law Enforcement Radio System (SLERS). This issue includes portable and mobile M/A-Com equipment purchased by the Fraud Division for phases 1 - 5. M/A-Com warranties for phase 3,4 and 5 mobiles are only good through April 2005. Warranties for phases 3, 4 and 5 portable transceivers and replacement portable transceivers are good through December 2006. Warranties for phases 1 and 2 mobile and portables are good through December 2006. There are currently have 50 mobiles (phases 3,4 and 5) that will need maintenance contract coverage in the 2006 - 2007 budget year. This figure is approximately \$6,250 (50 x \$150). There are another 66 portables for phases 3, 4, and 5 that have a warranty through December 2006. This means that 6 months of maintenance is needed for each unit and the approximate cost is \$4,125 (66 x 62.50 = \$4,125). Maintenance issues for fiscal year 2006 - 2007 will be approximately \$19,187.50 for the entire division. In addition, user fees for all participating 800 MHz Joint Task Force (JTF) agencies are an additional recurring expense. At a recent JTF meeting, this user fee was determined to be \$225 per year per user. This annual fee is approximately \$28,800 using our present law enforcement FTEs. Additional statistics are available for the Fire and Arson for \$32,720. Funding is from Insurance Regulatory Trust Fund. 57	5400A20	LAW ENFORCEMENT PERSONNEL - RECRUITMENT AND RETENTION	Florida's Division of Fire Marshal/Bureau of Fire and Arson Investigations urgently needs increased funding to pay salaries that are competitive with other key law enforcement agencies in Florida. Because of salary inequities among law enforcement agencies in Florida, the Bureau is challenged to recruit and retain qualified personnel. An analysis of salaries paid to arson investigators within Florida in 2006 shows that the Bureau's starting salary for a detective is dramatically lower than salaries paid by virtually every local fire department for detectives. For example, while the minimum salary for a Bureau detective is \$43,783, the Broward County sheriff's department pays arson detectives \$86,000. Similarly, Orlando's fire department pays arson investigators \$62,662 - well above the Bureau's minimum for a detective. The Bureau has lost 11 detectives in the past year, most to local agencies and insurance companies. In the past five years, 2000-05, the Bureau has lost 31 (39 percent) of its detectives to other agencies. The high attrition rate among investigators-average tenure at the Bureau is about six years. Most of the Bureau's remaining investigators have less than five years experience. This is a new issue. 9	160E100	REALIGNMENT OF CONTRACTED SERVICES ADD	Section 216.011(1)(n), FS, defines the appropriation category "Expense" and has historically include contractual services. Contractual services are defined in section 287.012, Florida Statutes, as the "rendering by contractor of its time and effort rather than the furnishing of specific commodities." Based on statutory changes effective July 1, 2006, the Expense category can no longer include contractual services. This issue represents the transfer of contractual services budget from the Expense and OPS categories to an alternate, more appropriate appropriation category. This includes a transfer of services related to consulting, court reporting, legal, process serving, expert witnesses, custodial & janitorial, temp employment, background checks, system development, training, advertising, security, mailing & delivery, banking, moving, credit bureau reports, copying, storage, news clipping, shredding, file destruction, software, monitoring, catering, location, business process reengineering, repairs & maintenance, building alterations & installations, IT infrastructure & software maintenance. 19	2306000	FUNDING FOR INCREASED COST OF FUEL AND UTILITIES	The Governor's Recommended Budget provides funding for the increased cost of fuel and utilities. The increase in cost of fuel and utilities is based upon the actual expenditures for such commodities and services in Fiscal Year 2004-05, adjusted for growth pursuant to applicable consumer price indices. There has not been any recent statewide price level increase to this cost. The Governor applied growth rates to the agency's historic expenditures for classifications as follows: electricity 9.2%; natural gas 19.8%; fuel oil and propane 22.2%, and gasoline & diesel fuel 8.6%.	0.00	0	0	0	0	0.00	0	27,059	20,865	47,924	0.00	0	27,059	20,865	47,924

30	3400090	INCREASE IN FUND BASED ON CHILD SUPPORT ENFORCEMENT COST ALLOCATION PLAN	Federal funds for Child Support Enforcement is covering a disproportionate share of departmental overhead assessed to the Child Support Enforcement program. This has accumulated over recent years due to the use of funding-split tables and availability of unencumbered cash balances in program trust funds. This shift is necessary to comply with federal requirements for overhead (indirect) funding allowed in the Cost Allocation Plan submitted to the federal agency. In addition, due to a cap (10%) on overhead assessments charged to the unemployment tax for administration, the agency has requested a portion of the cost be shifted to the General Revenue Fund. <b>Agency's Priority #8.</b>	0.00	0	1,631,550	0	1,631,550	0.00	0	1,631,550	0	1,631,550	0.00	0	1,631,550	0	1,631,550

In addition, the program has experienced overall cost increases resulting from the change in the nation Consumer Price Index. The CLERC system is highly complex requiring expertise in accounting, cost accounting, auditing management of large volume processing operations, child support laws, rules and procedures, and technology including wide area network, data bases and child support application. The agency currently estimates that \$6,554,369 will be disbursed from their base budget this year.	0.00	0	0	178,494	178,494	0.00	0	0	0	0					HOLD

		4400480	CENTRALIZE PRIVATE SERVICE OF PROCESS	This issue is for funding to expand the usage of special process servers for difficult to serve cases by fifty percent. The expansion will enable the Child Support Enforcement program to continue to be proactive in reducing timeframes for successful service of process and thus reduce the time to establish paternity and establish or modify support orders. Although private service of process is more expensive, under the right circumstances it provides an efficient alternative to standard service of process for the cases the program defines as difficult to serve.	0.00	0	0	493,550	493,550	0.00	0	0	0	0	0.00	0	0	0	0

		4400490	DADE COUNTY DEMONSTRATION PROJECT - CALL CENTER UPGRADE	The State Attorney (SAO) for the Eleventh Judicial Circuit administers the Miami-Dade county child support enforcement program under contract with DOR. The SAO provides the same general child support enforcement services that DOR provides in the other counties. DOR reimburses the SAO costs associated with providing child support services. Miami- Dade operates a call center, independent of the DOR central contact center. A key component of CAMS Phase 1 customer service will be the computer telephony integration (CTI) between the CAMS system and the centralized CSE call center. This integration will allow inbound calls to the program's 1-800 customer service number to be routed through the Department's Interactive Voice Response (IVR) Command and Control (ICC) platform and Cisco Intelligent Contact Manager (ICM) system. 52	4400390	Child Support Payments Processing Financial Losses	The Child Support Enforcement Program has been accumulating losses since the program inception in 1975. Losses are primarily related to insufficient-funds checks from noncustodial parents, employers, and other payors of income. Due to federal requirements, support payments are made to custodial parents before checks clear banks. In addition, federal law limits the state's ability to recoup payments made in error. The program continues to use available child support collections to fund the losses and beginning in December 1999, available collections in the local State Disbursement Unit (SDU) accounts were also used to provide a cash float for the losses. The current practice results in cash shortfalls and impedes the ability to implement child support program operational improvements. DOR has indicated that a current-year, inter-fund loan may be required in order to avoid delays in transfers to proper funds. Of the \$28.1 million, \$14.2 million would be transferred to the state's Child Support Clearing TF and \$13.8 million would be available for transfer to the local SDU accounts following the results of a financial reconciliation.						0.00	0	Governor recommended \$31.4 million in GR in a separate section of his proposed bill.			0.00	0.00	31,395,913	0.00	31,395,913

55	4400370	Impact of Federal Deficit Reduction Act on Child Support Enforcement	The Federal Deficit Reduction Act was signed by the President in February - Recent actions taken by the federal government will significantly impact the Florida Child Support Program. The new federal law requires, effective October 2006, a \$25 annual fee [assessed to parents] for cases that are non-state assistance. The fee assessment has a \$500 annual collections threshold that triggers the charge. Current FL law does not allow this assessment to parents; however, 66% of the fee must be forwarded to the feds for their share regardless of the state's source of funds. The nine-month cost for Fiscal Year 2006/07 is \$1.2 million. See issues 3400200 and 340300 for the portion related to funding constraints for genetic testing costs. 		4300A10	EQUALIZATION OF SALARIES & BENEFITS NEEDS	During FY 2002-03 and 2003-04, the department went through a major reengineering and reorganization Project. As a result of the Project, 249 positions and \$9.3M in salary appropriation was reduced. Reductions were based on staffing requirements to meet the projected workload during FY 2002-03. Due to the change of functions to support the reengineering processes and the reduced staff level, position upgrades were anticipated, however, budget was not retained to fiscally accommodate increases. A portion of the total budget reduction was transferred to a special category to pay the vendor a percent of the cost savings per the contract. The final payment on that portion of the contract is due in FY 2005-06. A budget reduction of \$4.2M has been proposed to the category used to pay the vendor. The department requests and the Governor recommends retaining 10% of the reduction to meet salary requirements within the department where excessive salary reductions have most impacted the department's ability to fill vacancies or allow for reinstatement of supervisory positions.	0.00	0	0	420,000	420,000	0.00	0	0	420,000	420,000	0.00	0	0	0	0

		4300A20	ALIGNMENT OF SALARIES & BENEFITS	After previous realignment of salary and benefit appropriation, there are still some budget entities with excess appropriation and those with a shortage as a result of too much budget having been transferred when the vacancy rates were high. Further realignment has been computed and applied prior to alignment of the requested increase for areas most impacted by the reorganization. The department requested, and approval was given, for large realignments of Salaries and Benefits budget authority in FY 2004-05 and FY 2005-06 General Appropriations Acts. In many instances, budget entities have sufficient Salaries & Benefits budget authority, however some do not. The Governor's Recommended Budget includes the realignment of Salaries and Benefits between budget entities in several programs to properly align the budget. This is a net zero issue.	0.00	0	0	(463,000)	(463,000)	0.00	0	0	(463,000)	(463,000)	0.00	0	0	(463,000)	(463,000)

33		5100010	CIGARETTE TAX STAMPS	The department contracts with an outside vendor to print the cigarette tax stamps for the state in amounts representative of the tax amount for individual packages of cigarettes. Once the stamps are printed, they are forwarded to the Division Alcoholic Beverages and Tobacco field offices for distribution to the stamping agents. The wholesale dealers that are approved as stamping agents order the stamps based on cigarette purchases. As the stamps are disbursed to the stamping agents, the excise tax is charged for the cigarettes. In FY 06-07, \$432,600,000 of excise taxes for cigarettes are projected to be collected. For FY 2006-07, the department projects that 1,162,946,429 cigarette stamps will be printed. Based on the contracted printing rates, the department expects to spend \$651,250 in FY 06-07, which represents a \$91,650 deficiency compared to the recurring appropriation amount of \$559,600. The department requests that the recurring appropriation amount of \$559,600 Cigarette Tax Stamps be increased to \$651,250 for the Alcoholic Beverages & Tobacco Trust Fund.	0.00	0	0	91,650	91,650	0.00	0	0	91,650	91,650	0.00	0	0	91,650	91,650
34		51R1000	ALIGNMENT OF DEPARTMENT SALARY RATE	Chapter 2005-152, Laws of Florida, amended section 216.181, Florida Statutes, to provide that the annual salary rate for each department be determined in the General Appropriations Act. The Department of Business and Professional Regulation requests a realignment of salary rate among the budget entities to reflect more accurately current rate usage by each budget entity. In addition, the department requests a reduction of \$300,000 in salary rate to ensure that the appropriate amount of salary rate is closely aligned to the Salaries and Benefits appropriation in each budget entity.	0.00	(300,000)	0	0	0	0.00	(300,000)	0	0	0	0.00	(300,000)	0	0	0
35		5N00030	OPERATING BUDGET REDUCTION TRANSFER PAYMENT OF CARD ROOM TAX TO LOCAL GOVERNMENTS TO NON- OPERATING	Due to the increasing distribution, the department has found it necessary to process budget amendments in FY 2004-05 and FY 2005-06 to have sufficient budget authority to process the payment to the local governments. If the distribution to local governments were transferred to nonoperating, the department will have the opportunity to estimate the actual distribution near the end of each fiscal year when requesting nonoperating budget authority for following fiscal year. By having a later date to request nonoperating budget authority, it is likely that the distribution amount will be more accurate and eliminate the need to process budget amendments requesting additional authority to make the payments to local governments. If the Pari-Mutuel Wagering Cardroom Tax Distribution to Local Governments remains in the operating budget, the department estimates that the budget authority required in FY 2006-07 to make all distributions will need to be increased by \$535,000, requiring a total appropriation of \$766,231. The Cardroom Tax Distribution for FY 2005-06 was completed only after the submission of a budget amendment (EOG #B2006-0169) increasing budget authority for the current year from \$231,231 to \$476,123. 		6N00040	OPERATING BUDGET REDUCTION TRANSFER BEVERAGE LICENSE TAX FOR CITIES AND COUNTIES TO NON-OPERATING	DBPR requests the transfer of these funds from operating category to nonoperating status. Section 561.342, F.S., requires DBPR to return 24% of the alcoholic beverages license taxes collected within each county to the county tax collector and 38% of the license taxes collected within each municipality to that municipality. Due to the growth in the beverage license tax distribution to local governments, DBPR has submitted budget amendments to the Legislative Budget Commission (LBC) for each of the past two years to process the 4th quarter payment. A budget amendment will be needed in FY 2005-06. Transferring the distribution to nonoperating allows the department to estimate the distribution near the end of each fiscal year when requesting nonoperating authority for the next year. This issue eliminates the need for LBC amendments and ensures timely processing of the final distribution. If the beverage license tax remains in the operating budget DBPR estimates the budget for the FY 2006-07 distribution will need to be increased by \$2,059,327, requiring total of \$13,303,327.	0.00	0	0	(11,244,000)	(11,244,000)	0.00	0	0	(11,244,000)	(11,244,000)	0.00	0	0	(11,244,000)	(11,244,000)
